I will, but with that info., I have a feeling that they, (and everybody else) will decline.

The laboratory results show the levels to be very high and not lower than 1991. Please let me know if you are contacted about this site and the results of Colony's decision.

Thanks for the heads up...if we can compare them with the early one (a few years back) and can see that the levels have dropped, then maybe we can do something, but won't guarantee anything.

Actually, the groundwater sample results came back about a month ago (I just got them yesterday). I just wanted to see if they'd contacted you with them. They do not look good, but I will let them send you the results.

Nope....sorry, it may take awhile for them to get the testing that we need to see, not sure though.

Hi Michelle,

Could you please tell me if you have heard anything more from Short Stop LLC with regards to insuring the tanks at Flying B 297?

Thank you,
Krystal

Hello Gary and Nabin,

Thanks for meeting with me last week. As requested, here is a copy of the penalty I issued to you in December for failing to comply with cathodic protection requirements at Flying B 29. Also attached is a copy of a delinquency letter from Ecology's Fiscal Office that you have likely already received.

There is still missing information regarding the cathodic protection testing that was completed on December 3, 2010. The December 13th letter I sent to you and Kevin (attached) outlines four items that needed to be addressed by January 3rd. Kevin has submitted a signed copy of the checklist, however, the other three items must still be addressed.

Please respond to these issues immediately. If you have any questions, feel free to contact me.

Krystal
